SUMMARY

Software Engineering student at PUC Minas and IT Development Intern at the Comptroller General of the State of Minas Gerais. Experience developing full-stack web applications using React, Laravel, Livewire, Node.js and PostgreSQL, applying software engineering principles, REST APIs and relational databases. Seeking opportunities as a Software Engineering Intern or Junior Software Developer.

PROJECTS

BarberFlow | Laravel • Livewire • Tailwind CSS

- Developed a web system for financial and operational management of barbershops.
- Implemented revenue control, subscription management and barber performance tracking features.

LUMAP | React • NestJS • TypeScript • PostgreSQL • Prisma • Docker • Tailwind CSS

- Developed, as part of a team, a full-stack web system to digitize the operations of an industrial powder coating company.
- Implemented customer, quotation, work order and financial management features with real-time tracking.
- Contributed to database modeling, REST API development, front-end/back-end integration and React interfaces.

Academic Projects | Java • Python

- Developed Java applications applying object-oriented programming, modeling and data structures.
- Built Python projects involving graphs, GitHub API data mining and network analysis algorithms such as PageRank, Betweenness and Closeness.

EXPERIENCE

Comptroller General of the State of Minas Gerais
IT Intern (Support & Development) | May 2025 – Present

EDUCATION

PUC Minas — Bachelor's Degree in Software Engineering
2023 – Present

SKILLS

Languages: HTML/CSS, JavaScript, Java, PHP, Python
Frameworks: React, Node.js, NestJS, Laravel, Livewire, FastAPI
Databases: PostgreSQL, MySQL
Tools: Git, GitHub, GitLab, Docker, Figma, Notion

LANGUAGES

Portuguese: Native | English: Advanced (B2) | Spanish: Intermediate
